Personal Style

Every person has his or her own personal style. Some enjoy working and being around people, whereas others would rather focus on tasks. Some people are very structured in their lives, whereas others enjoy unstructured life and tasks. The personal style of an individual has a tremendous impact on how he or she performs and enjoys a particular job. For example, an individual who really enjoys being with and working closely with other people would not be happy sitting alone in an office every day counting widgets. The exercise below will help you determine your personal style which in turn will assist you in determining what type of ministry is best for you.

Each question below presents a particular situation and two ways in which you could respond to it. On a scale of 1-5, circle the number that best represents your response. At the end of the exercise transfer the two totals to the grid to determine your style.
